

UNISTEER REAR BUMPER

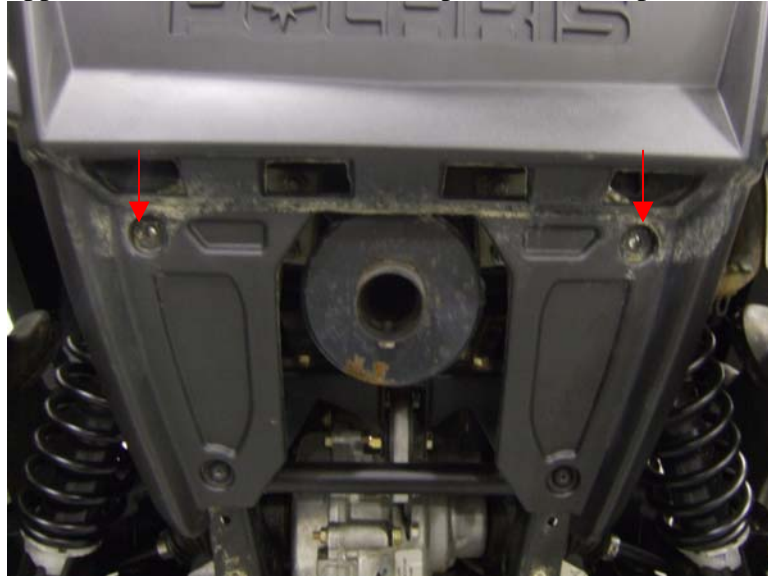

KIT NUMBER 8080020

2008-09 Polaris RZR Rear Bumper Install Manual

Thank you for purchasing our 08-09 Polaris RZR Rear Bumper. Please carefully read this instruction sheet entirely before you begin to install the sport cage.

RZR Rear Bumper Install

1. From the rear of the vehicle you need to drill out the stock holes in the plastic area where the upper mounts are for a stock or replacement bumper.

2. Have someone hold the bumper in place for this step. Install the 5/16 bolts, washers, and locknuts in place on the lower frame mount of the vehicle. (Do not tighten at this time.)
3. Next, install the 2 upper mounts in place by first inserting the spacer in the plastic hole of the vehicle. Then put the supplied bolt through the mount of the bumper, through the spacer, through the vehicle body to the inside of the framework and install the supplied nut to the backside.
4. Once all hardware is installed tighten in sequence to ensure a level and centered install.
5. Torque all hardware to 30 ft. lbs.

We welcome your suggestions & comments to make this or any of our installations better! If you have any questions or problems regarding this product please contact us at:
